

DR. PRICE'S CREAM BAKING POWDER

A pure, healthful, Cream of Tartar Baking Powder

When buying an article of food you are entitled to know exactly what you are buying—its quality and ingredients.

If this information is refused don't buy it.

Some of the low grade baking powders are advertised, but the ingredients of the powders are scrupulously concealed.

A housekeeper would not use a baking powder containing alum if she knew it.

It is well when buying to examine the label on the can. Unless it shows the ingredient cream of tartar, don't buy it.

Dr. Price's baking powder is absolutely free from alum.

U. A. C. DEFEATS THE UNIVERSITY

Logan, Nov. 27.—Fighting with a desperation that brooked no check, the football players of the Utah Agricultural college crushed the defense of the University of Utah here this afternoon and administered to Coach Bennion's men the worst defeat they have sustained since he took charge of the team. The score was 21 to 0, in favor of the local eleven, and indicates about rightly the difference between the two teams as they lined up this afternoon.

From start to finish the Aggies displayed great speed and generalship and hammered the Utah line from end to end with a consistency that excelled any brand of football seen in Utah this year.

The game was played on the field at the college. It had been booked for the new Adams field, but the recent rains made the new field hope-

lessly muddy, while the old gridiron was in good shape.

The sun was shining at 1 o'clock and about 2000 wildy enthusiastic footballists climbed the long hill to watch the big battle. The long bleachers which skirted either side of the field were jammed tightly with gayly dressed men and women. The Aggies were very considerate in this respect, and all decorations spoke as well for the state university as for the Aggies. One of the unique features of the decorations were the red, white and blue umbrellas which were carried by hundreds of the ladies. This combination of colors served the double purpose of representing the red and white of the university and the blue and white of the Aggies.

At the end of the first quarter a chilly wind arose, which was soon followed by a freezing rain, which made the spectators' end of the game highly uninteresting, as there was no shelter on the field. When the two teams lined up on the field, it was plain that the boys in the crimson uniforms were heavier than the blues. The usual preliminary practice was dispensed with by both

teams, so that before the kickoff there was no chance to size up the two aggregations.

From the start, however, it was clear that the blue men had the fighting qualities which win, while the absence of this spirit in the varsity lineup soon manifested itself.

To come to the game itself: It was not the smooth, clean game that has been played this year in Utah. It was a fight and squabble from start to finish. There was hardly a down that did not call for a consultation of officials. Captain Brossard of the Aggies seemed particularly concerned lest his team should have something slipped over on them by the officials.

This resulted in the assumption of a similar attitude by Captain Sutherland and from the middle of the first quarter until the end of the game there was one constant scrap.

The rivalry of the two teams reached a point which hardly became the representatives of two colleges. The Aggies were so determined to win that they lost control of themselves in their enthusiasm and every time an Aggie tackled a crimson runner, he took the precaution to assure himself that said runner was down by giving him an additional twist of the neck or snub of the nose into the ground.

This at first surprised the varsity men, but they came back and were just as rough as their opponents.

The shining star of the day was Hugh Peterson, the speedy Aggie full-back. Peterson is not a big man, but he is wonderfully fast. He was good several times for thirty and if it came to a pinch a Utah runner the man with a red sweater came to a most sudden stop. On the other end, Egbert, the former Ohio star, did well for the A. C.

Next to Peterson, the best Aggie man was Dave Jones, left end. Jones is a little fellow, not very tall, but built all the way up. He is "some" speedy, and when he hit a Utah runner the man with a red sweater came to a most sudden stop. On the other end, Egbert, the former Ohio star, did well for the A. C.

TROOPS LEAVE FORT DOUGLAS

Ordered to Proceed to El Paso Without Further Delay.

Orders for the officers and enlisted men of the Twentieth United States Infantry to move at once to El Paso, Tex., were received by Colonel J. A. Irons, in command at Fort Douglas, at 2:30 o'clock yesterday afternoon.

The entire regiment and detachments of the hospital corps and the quartermaster corps will leave early tomorrow morning over the Salt Lake Route for Colton, Cal., from which point they will go over the Southern Pacific to El Paso.

A freight train running extra, will leave this evening over the same route with stock and equipment belonging to the regiment. This includes about 150 horses and mules, which are being transported to the front.

The members of the regiment will travel in three sections of a special train, in standard and tourist sleepers, and will leave early tomorrow morning if the companies are ready to move them.

Lieutenant Colonel Frederick Perkins will be in command of the regiment as soon as it leaves the military reservation of Fort Douglas. Colonel J. A. Irons being in command of the post. Colonel Irons will be in command at Fort Douglas until Monday, when he will leave for Tokyo.

Major Willis Uline, in command of the quartermaster's corps at Fort Douglas, will remain there and be in command after the departure of Colonel Irons.

There are nearly fifty officers who will leave for the border with the Twentieth Infantry, and there are 775 enlisted men. Of the men 728 are members of the Twentieth and the remainder belong to the hospital corps and the quartermaster corps.

Major Uline, who has had charge of preparations for the movement of the troops, will have only about a dozen men here to manage the affairs of the post. He will have a few general prisoners in his charge until orders are received as to their disposition, and will be in command until further orders.

Most of the women of the fort will remain there until they know more of the outlook at El Paso, although some will leave soon for homes in the east.

It is the intention of the promoters to manufacture the machine on the western coast and make Salt Lake City the headquarters and distribute center for the international country. A demonstration plant will be established somewhere in Utah, according to Mr. Ennis.

IF ALL THE TIN CANS

Containing the Fruits, Vegetables, Fish, etc., sold to our patrons could be collected together, we think there would be one for the caudal appendage of every canine in the state.

We Carry a Complete Line of Canned Goods TRY THESE:

Del Monte Brand of California Fruit. We have just received a complete assortment.

In Tin (fresh)—Strawberry, Peach, Raspberry, Blackberry, Pear, Cherry.

In Glass (Preserves and Jams)—Logan Berry, Strawberry, Raspberry, Fig, Quince, Plum, Peach, Cherry, Pineapple, Apricot, Cranberry—and the prices are right.

HARRIS GROCERY CO. 338 TWENTY-FIFTH ST. PHONES 2215-2216

but with a posse of men started to look for them again today. He found that they had fled into the tunnel of the mine. The suspicions were confirmed when Mike Stefano reported that Lopez had visited his cabin late last night.

Stefano knows Lopez well. He first met him about four months ago and saw him frequently up to a week ago. Stefano is a well-known miner, about 32 years old, with a wife and two children. He said:

"I was aroused a little after 11 o'clock last night by a tapping on the rear window. Then a man poked a pistol through the window and ordered me to come outside." He said, "Someone wants to see you out here."

I stepped out and recognized Lopez. I told him I wanted to help him and told him to enter the house. He came in and went across the room, taking my 30-30 rifle down from where it was hanging on the wall. Then he gave me his 30-government rifle and eleven cartridges, taking forty-two from me of my rifle.

Lopez was carrying his shoes over his shoulders and was wearing a pair of badly worn rubbers. Both feet were terribly frozen and swollen. His left foot was almost twice its natural size. In his left shoe there was a piece of the flesh that had been torn from his heel when he took off his shoe.

"I gave him some clean socks and offered him a pair of shoes. His feet were in such shape that he was unable to get on the shoes. I gave him some overshoes, which he wore over his socks. I also gave him three loaves of bread, some cheese and some ham. I also gave him a pair of blankets.

"He told me he would be back in two or three days and for me to get five more boxes of cartridges to have for him when he came again. He also asked me to find Julio Corrello and other Mexicans to notify them of his desperate needs.

"Before leaving the cabin he traded bats with me, giving me his cap for my large black soft hat. When he first came he wore a cap, a khaki coat, a red sweater and black trousers. He left his shoes behind and set forth for the mine. I last saw him entering the 200-foot level of the Minnie mine.

"I have known Lopez for several months and I know that the man whom I saw last night was he. His feet were in such bad shape that it is practically impossible for him to do any more walking.

Admitted Identity. "Lopez made no attempt to hide his identity from me. In fact, he admitted that he was wanted for several murders, and told me something of his wanderings. He spoke particularly of the fight he had in the hills last Saturday near Moesia.

"About thirty of them had me cornered," Lopez said, "and they fired about 300 shots at me. I was behind some rocks and none of the bullets hit me. I saw them coming toward me and I got two good shots at the leaders. I know that I killed one of the men, and maybe another one. The rest of the time I didn't get a chance to see any of the men, but I shot in the direction of their voices. After dark I was able to slip away over the hills without their seeing me."

"Lopez seemed pretty discouraged, but said that he would continue to fight to the last. He said he was suffering a great deal from his frozen feet, and asked me to get him some medicine.

"If my feet don't get better," he said, "I'm going to kill myself. Maybe in a couple of days you can come in the tunnel and find my body and get the reward. I know you are my friend and I don't think you will tell the officers. If you do I will come out of the mine and kill you and all of your family."

"Lopez was hardly able to walk, so I helped him carry the blankets and he lay down on them.

"I was afraid to tell anyone about this until I saw Tom Hoskins, the mine foreman. I am very much afraid that he will get out and kill me and my family. I have brought my family down to the hotel in Bingham because I am afraid to have them so near Lopez."

Deputy's Suspicions Aroused. The suspicion that Lopez was in the vicinity of the Minnie mine, which is a few miles west of Highland, was first aroused last night when Deputy Sheriff Douglas Hulsey found tracks on the dump of the mine. These tracks he found were similar to those of the bandit he had previously followed on Lake Mountain.

He lost the tracks in the darkness, but with a posse of men started to look for them again today. He found that they had fled into the tunnel of the mine. The suspicions were confirmed when Mike Stefano reported that Lopez had visited his cabin late last night.
